

## Who we are ?

Matheo Software was created in 2003 by business intelligence and information processing professionals from higher education and research. Matheo Software provides decision support solutions, information analysis, technology monitoring, which can efficiently exploit data to convert them into high value-added information.

Providing a simple use of its tools is Matheo Software's goal. Thus, its pricing policy makes it possible to develop professional tools traditionally used by experts in Industrial Property and in scientific, competitive and technology monitoring.

Our R&D team keeps developing our software and keeps them performing thanks to the latest methods and technologies of professional information analysis and visualization.

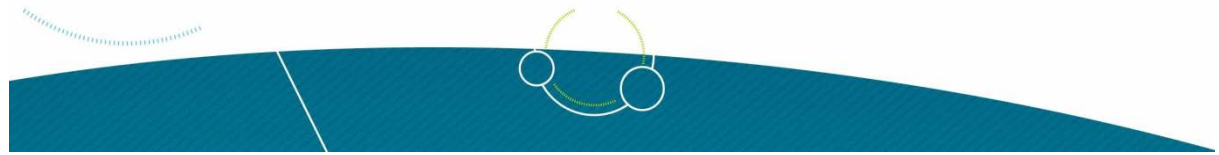

## Who are these softwares intended for?

Matheo Software tools meet the needs of information, innovation, R&D, Intellectual Property, business intelligence, monitoring, patents and data analysis professionals.

Matheo Software has many references in more than 30 countries and in many sectors.

Matheo Software is constantly listening to its customers and often provides new functionalities adapted to their needs in research and analysis of multiple data sources.

Customer references, complete descriptions of software and demo versions are available on our website <http://www.matheo-software.com>

## Matheo Software suite...

### Matheo Patent

#### Search, retrieve and analyze patent data

Innovation, Industrial Property, Patents Monitoring, R&D, ...

Complete, simple and efficient: Matheo Patent is essential for an efficient exploitation of patents.

- ▶ Quick access to patent information
- ▶ Simple and user friendly interface
- ▶ Automatic analysis and graphical representations

### Matheo Analyzer

#### Database Analysis and Information Mapping

Matheo Analyzer is a flexible and an easy-to-use software which permits to explore efficiently important volumes of data and converting them into strategic information.

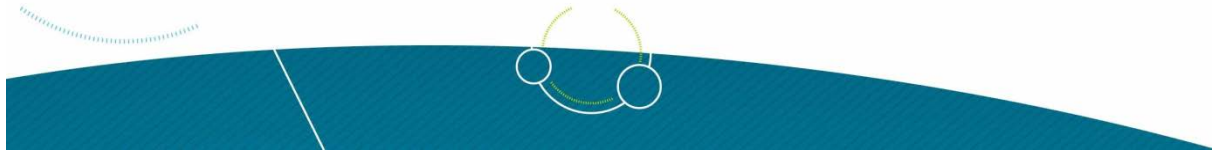

- ▶ Intuitive import of all types of structured data
- ▶ Reformatting and data extraction
- ▶ Graphic visualizations and maps

### Matheo Web

#### Internet search, survey and analysis.

Matheo Web watches over the Internet sources and uses information in a convenient and effective environment.

- ▶ Access to multiple sources of information web
- ▶ Automatic and graphical analysis
- ▶ An integrated Web browser

**Matheo Software Academic Program** aims is to provide teachers and students the resources and skills they need to study, implement and support their technological monitoring systems (patent watch, publications, ...).

Teachers and students whose school or university participates in the Academic Program can install Matheo Software solutions on the machines in the premises of the school or university or on their personal computer.

Software versions that are made available to students and teachers are the same as those provided to our industrial customers.

The Matheo Software support access and maintenance (access to patches, service packs and new versions) are included in the Academic Program for the duration of the subscription.

This program is based on:

// **A charge adapted** to the teaching of our software and its installation in the classroom: The financial terms proposed are particularly attractive

- Purchase of a Matheo Patent / Web license: Installing authorized on 10 stations
- Purchase a Matheo Analyzer license: Installation of 3 stations
- Volume discounts depending on the number of licenses

// **Resource Sharing:** PPT presentations, sample projects, best practices, case studies, ...

// **The use of free licenses for students** as part of their projects (limited time) for students with practical work or training involving the use of Matheo Software. The use of these licenses is only for personal and educational way.

// **Academic Events:** Matheo Software involved in conferences, seminars and conferences for academic presentations on technology monitoring or data analysis.

The software obtained through the Academic Program may only be used for educational purposes or non-commercial research.

## Academic partnerships with universities worldwide
